

Juan Pablo de Legarreta  
NETC-240  
Lab 9 – 3-19-2025

You will need to coordinate with another student to add them to your MS Team.

This lab will use your College M365 account

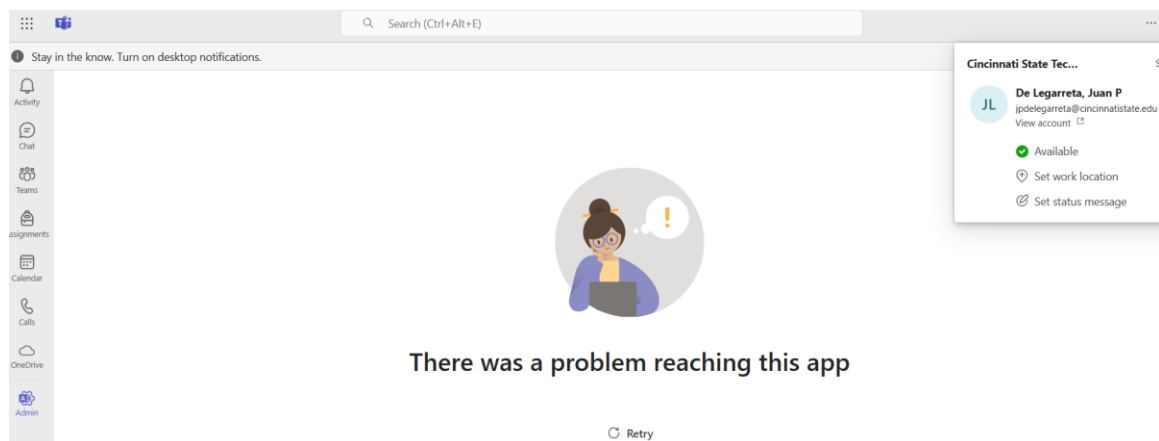

## Part 1

1. Create a new Teams site using your College M365 account called Lab9xyz (xyz are your initials).

Created a team called Lab9jpdL.

- a. Change the settings to disallow the creation of Private channels

Following the example of the video, I tried adding the Microsoft Teams Admin app, but it wouldn't work.

## You don't have access to the Teams admin center.

The account credentials you used to sign in aren't authorized to access this website.  
Make sure you're using the right account and that you have correct permissions.

**Error code:** INVALID\_PRIVILEGE

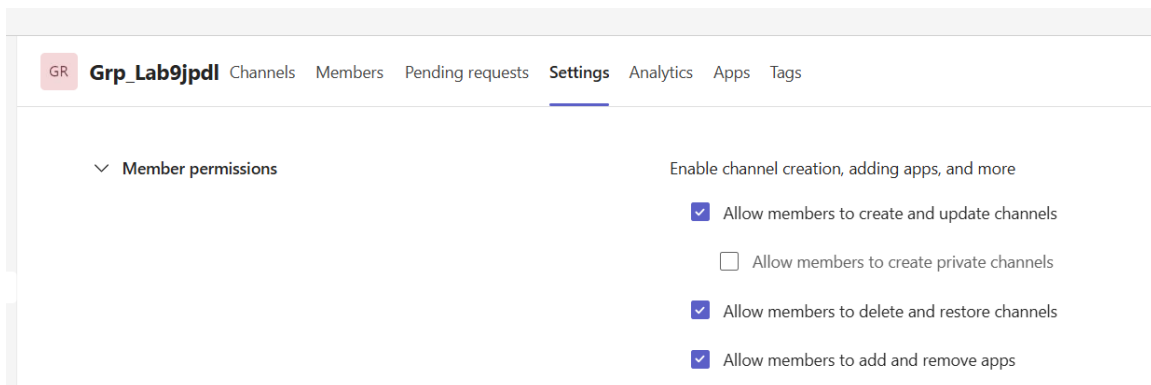

**Organization ID:** 4b4b6ba8-5186-4d09-b9b2-8c95f729c4b2

**Correlation ID:** 224f9afa-ba43-4141-8e9e-01e8d7808b26

**Time stamp:** 2025-03-25T18:34:57.6967999Z

[Sign out](#)

Trying to access admin.teams.microsoft.com was also unsuccessful. I believe this setting can be changed in the admin center but not directly in the teams interface. Still, I disabled the ability for members to create private channels, below:

b. Disallow guest access

I believe this setting is also only available through the Admin application of Microsoft Teams. The best I could do is disallowing guests' permissions, below:

The screenshot shows the Microsoft Teams Admin Center interface. At the top, there's a navigation bar with tabs: GR (highlighted), Grp\_Lab9jpdI, Channels, Members, Settings (underlined), Analytics, Apps, and Tags. Below the navigation bar, on the right, is a team card for 'Grp\_Lab9jpdI' with a 'Change picture' link. On the left, there's a sidebar with 'Member permissions' and 'Guest permissions' (expanded). The main area on the right shows settings for 'Guest permissions', including 'Enable channel creation, adding apps, and more' and 'Enable channel creation'. Under 'Enable channel creation', there are two unchecked checkboxes: 'Allow guests to create and update channels' and 'Allow guests to delete channels'.

c. Do not allow access outside of Cincinnati State

Another setting probably best used in the Admin center of Teams. Still, I selected the privacy setting to 'public', which allows members of the organization (Cincinnati State) to join.

### Edit Grp\_Lab9jpdI team details

Collaborate closely with a group of people inside your organization based on project, initiative, or common interest. [Learn more about teams and channels](#)

Team name \*

Lab9jpdI

Your org has some naming policies. Here's how your team name will look.  
Grp\_Lab9jpdI

Description

Lab 9 Assignment Team

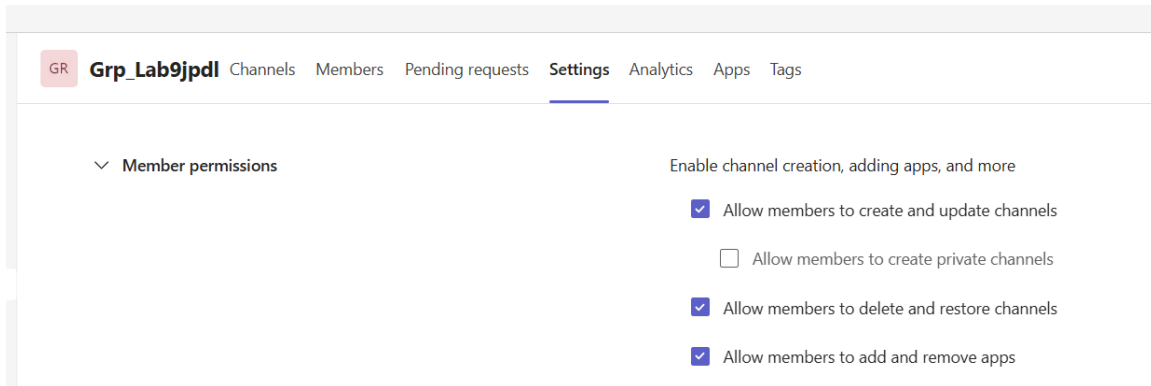

Classification

Privacy

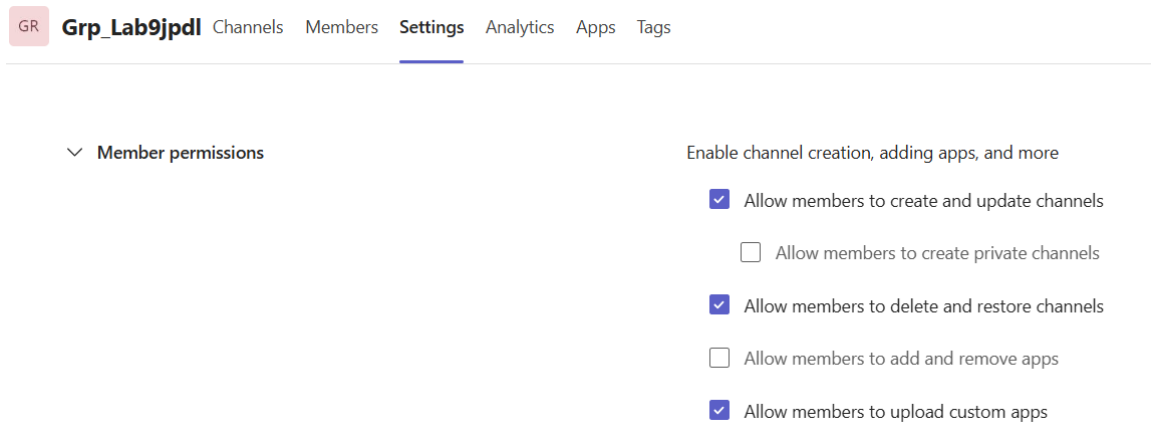

Public - Anyone in your organization can join

d. Do not allow other users to create private channels

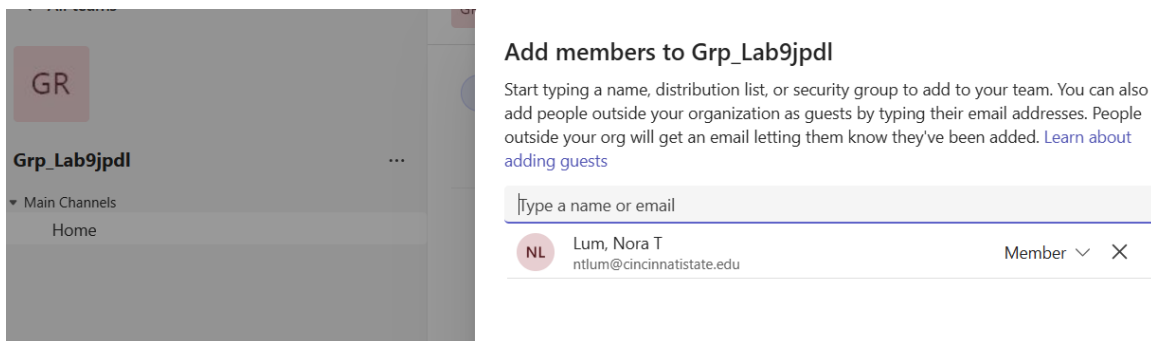

Here I toggled the option to disallow members to create private channels.

e. Do not allow other users to add or remove apps

Here I toggled the option to disallow members to add or remove apps.

f. Add another member (student in class). Coordinate with that student.

Added Nora Lum to the Team.

g. Create another Channel for M365 questions

in the know. Turn on desktop notifications.

< All teams

GR

▼ Main Channels

Home

### Create a channel

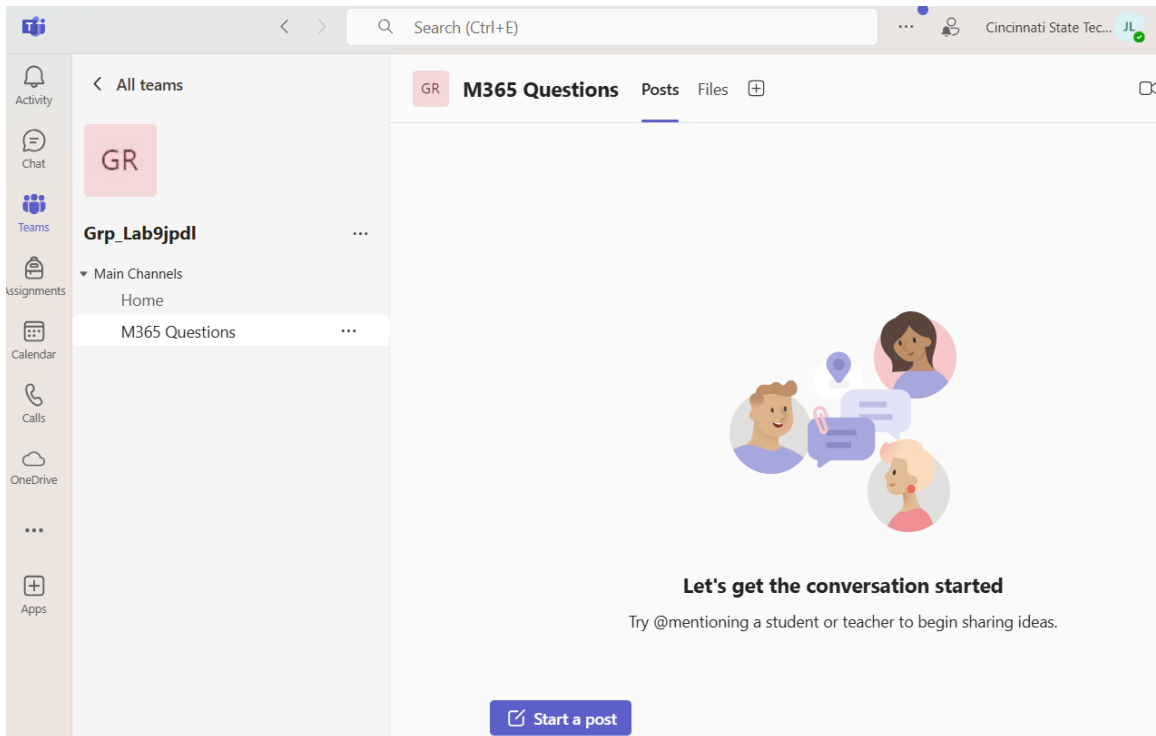

Channel name \*  
M365 Questions ✓

Description  
A place for all M365 questions!

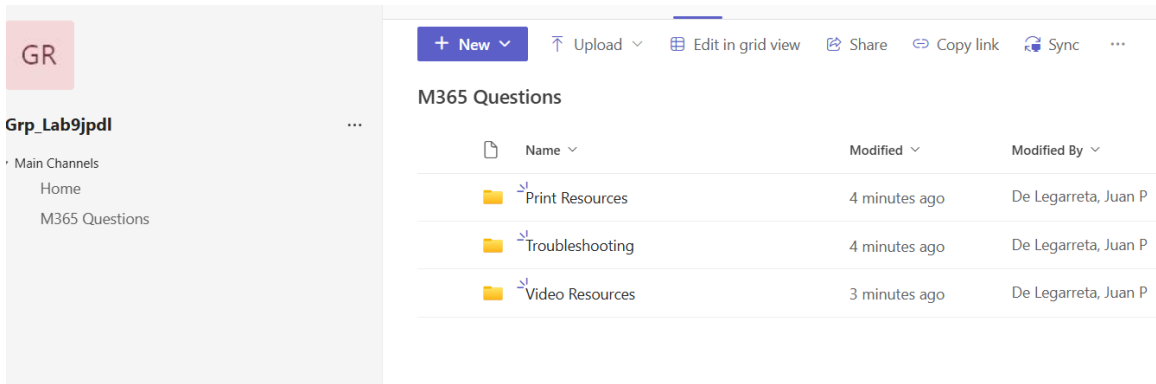

Choose a channel type \* ⓘ  
Standard — Everyone on the team has access ▼

☐ Recommend that people show this channel in their channel lists

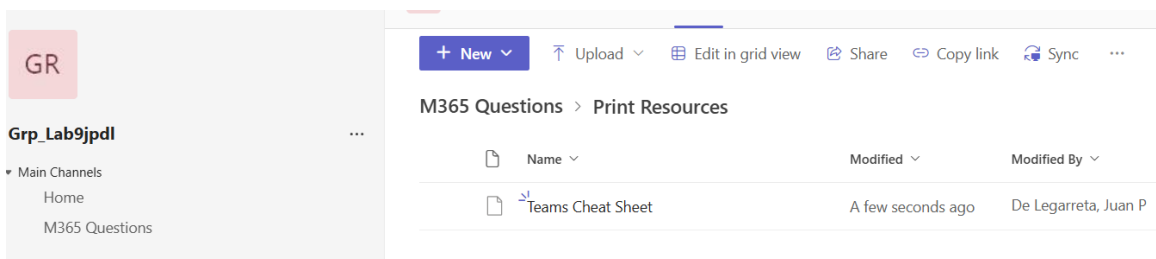

A channel called M365 Questions was created (above) and shown (below):

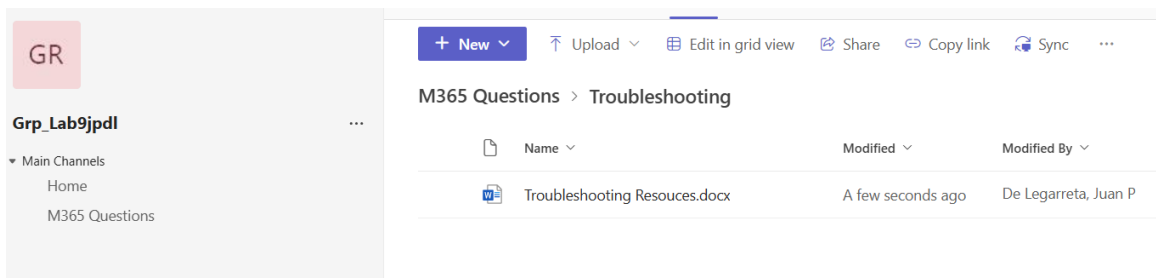

2. In the Files section, create/upload 3 folders. Use meaningful names for the folders. Each folder should have at least one file in it.

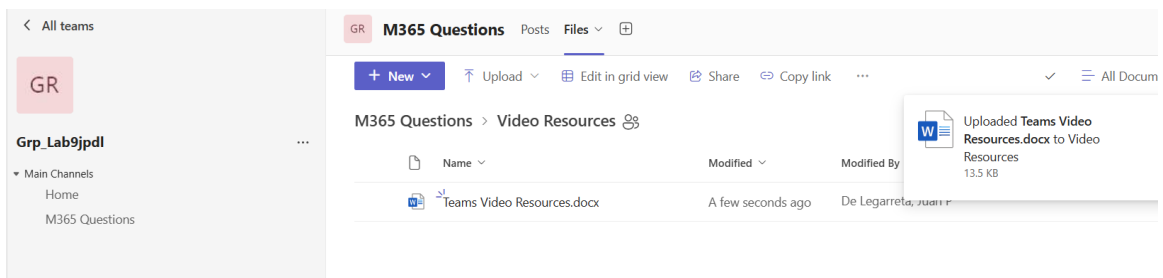

Created three folders – Print Resources, Troubleshooting, and Video Resources.

Placed the Teams Cheat Sheet in the Print Resources Folder

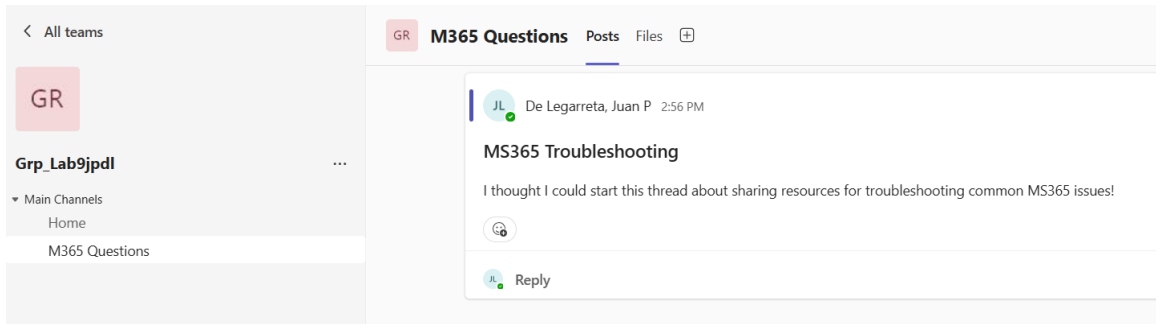

Placed the Troubleshooting Resources document in the Troubleshooting folder.

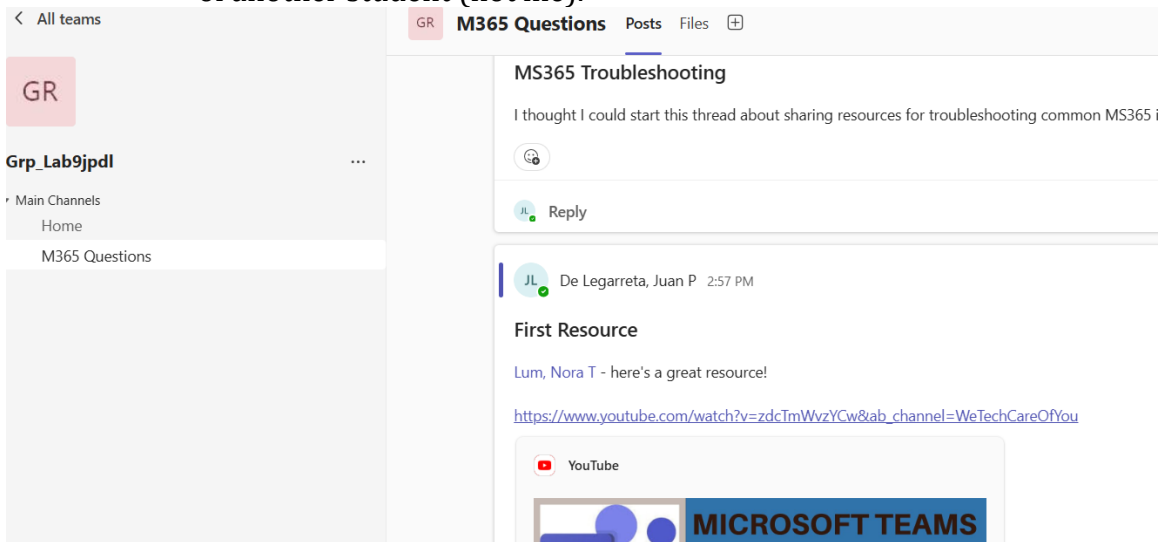

Placed the Teams Video Resources file in the Video Resources Folder.

### 3. Messages

- Start a Post. Create a message – about anything

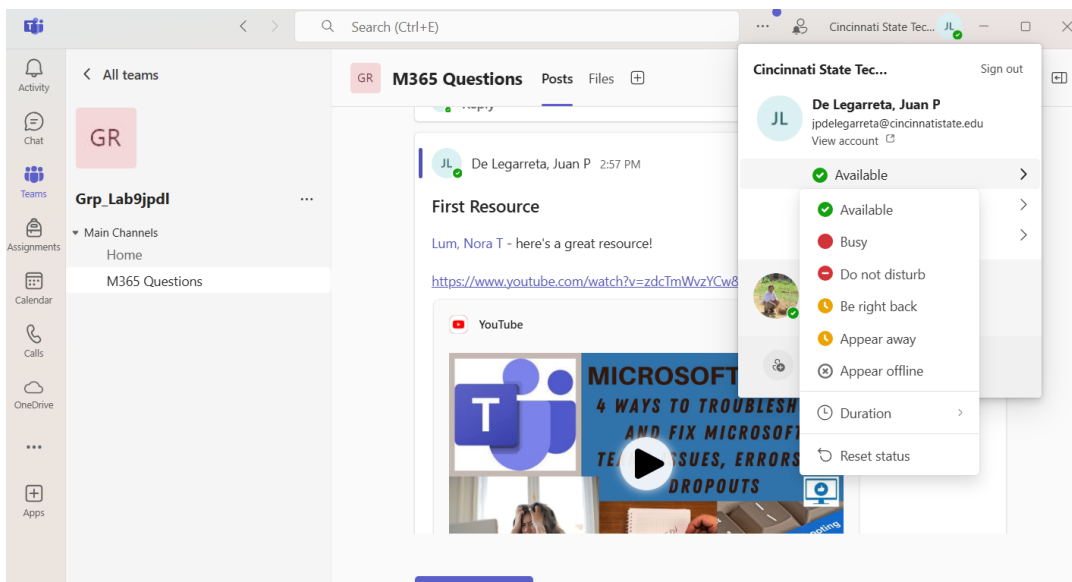

b. Create another message and use the @username. Use the username of another student (not me).

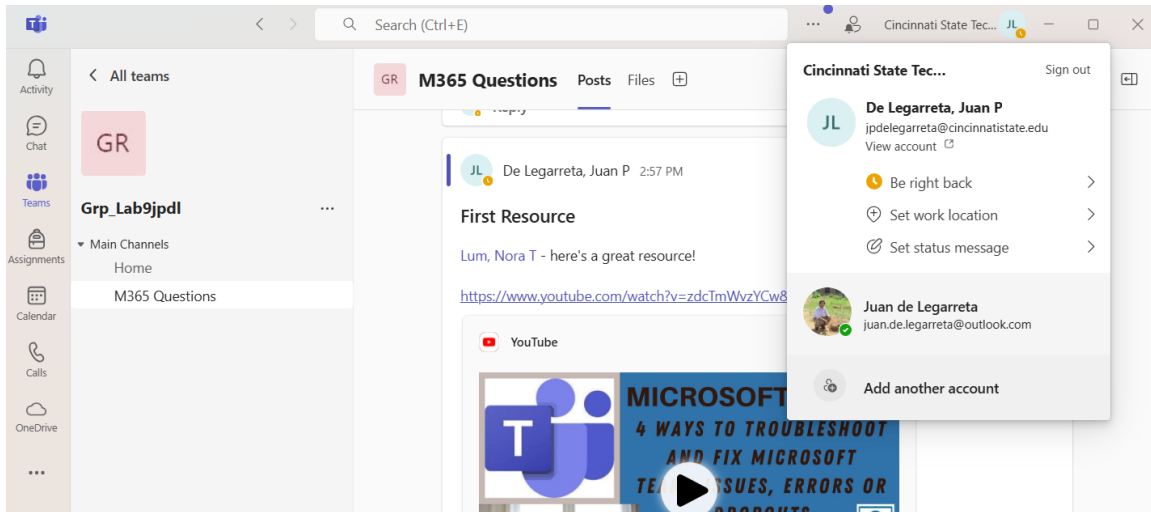

I tagged Nora Lum in the message sharing a troubleshooting video for MS Teams.

4. Show that you can change your Availability setting

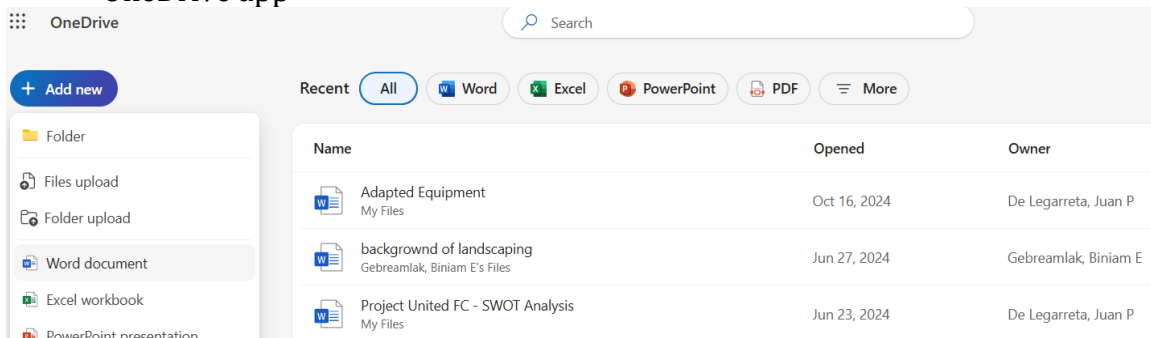

You can change your availability by clicking on your name in the app, selecting the 'Available' option in the drop-down menu, and then choosing your availability.

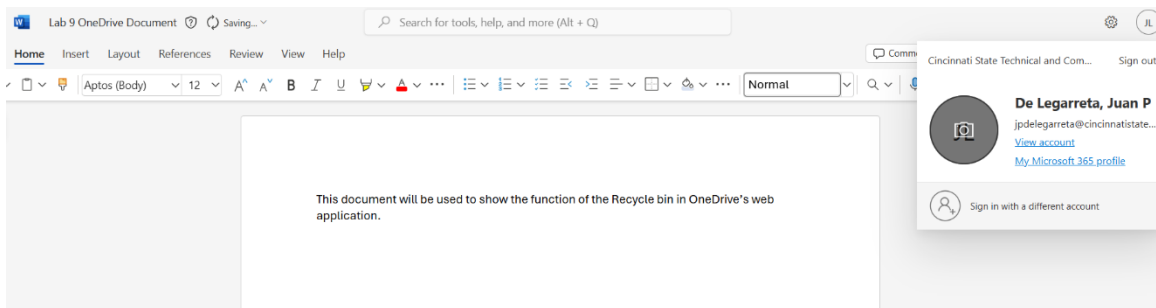

Here I changed it to 'Be right back'.

## Part 2

1. In your College OneDrive account, save a document using the web based OneDrive app

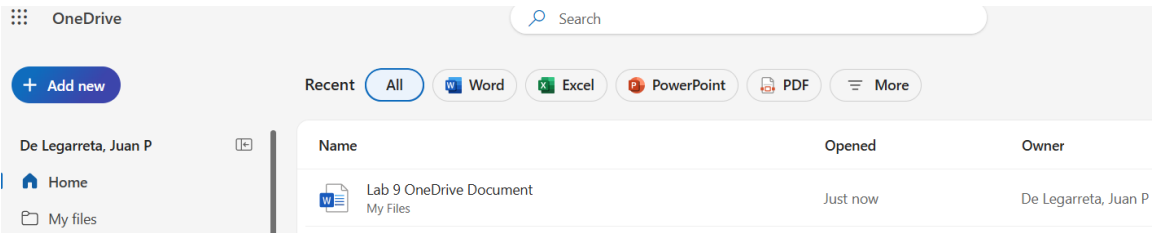

In my college OneDrive account, I am using the web-based app to create a new Word document.

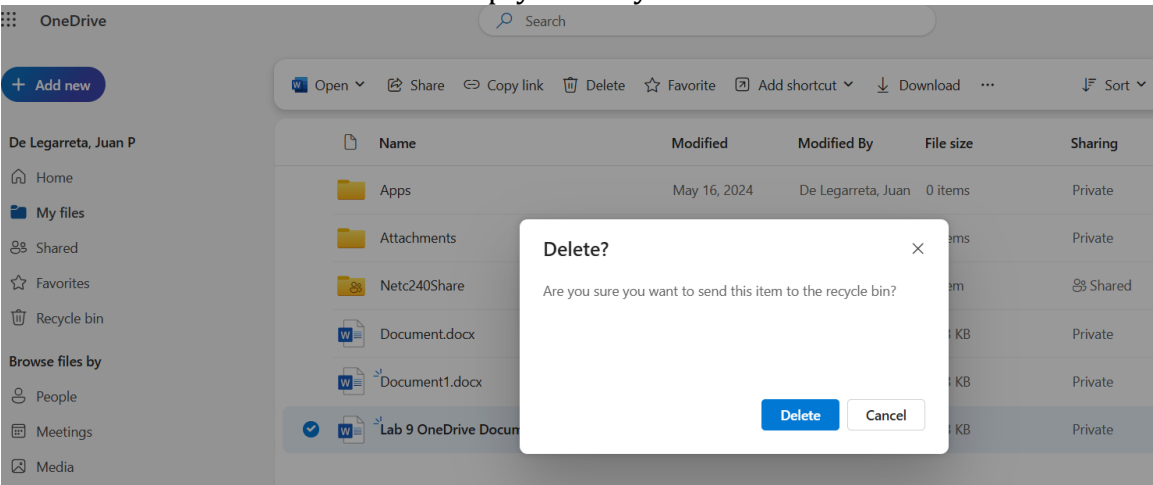

This simple Word document was created for this lab.

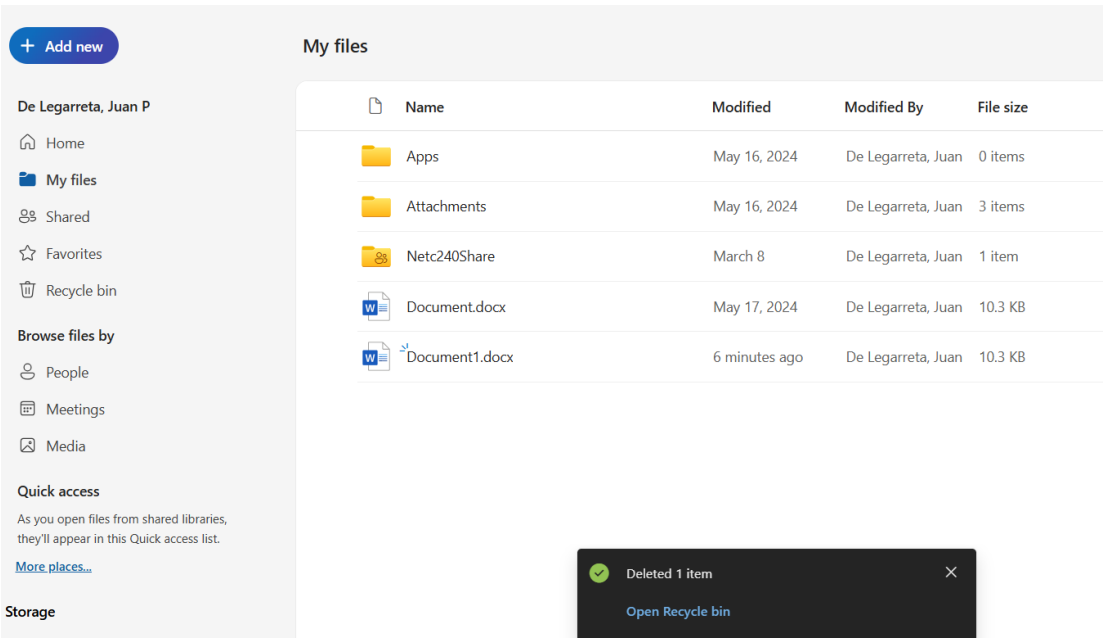

You can see the document in the OneDrive web app.

## 2. Delete the document and empty the recycle bin in OneDrive

I have selected the document in the My Files part of the OneDrive web app and selected the delete button.

The file has been deleted. It no longer appears in the My Files folder and I got the notification seen above.

Quick access

As you open files from shared libraries, they'll appear in this Quick access list.

Recycle bin

| Name | Date deleted | Deleted by | Created by |
|------|--------------|------------|------------|
|------|--------------|------------|------------|

Your recycle bin is empty

3. Verify the file has been removed. Then in Recycle bin, click on “Second Stage recycle bin” and recover the file.

The screenshot shows the OneDrive interface for user 'De Legarreta, Juan P'. The left sidebar contains navigation links: Home, My files, Shared, Favorites, Recycle bin, Browse files by (People, Meetings, Media), and Quick access. The main area displays a table of files in the Recycle bin:

| Name           | Modified       | Modified By        |
|----------------|----------------|--------------------|
| Apps           | May 16, 2024   | De Legarreta, Juan |
| Attachments    | May 16, 2024   | De Legarreta, Juan |
| Netc240Share   | March 08       | De Legarreta, Juan |
| Document.docx  | May 17, 2024   | De Legarreta, Juan |
| Document1.docx | 10 minutes ago | De Legarreta, Juan |

The file is no longer in the recycle bin nor is it in the My Files folder.

The screenshot shows the OneDrive interface with the 'Second stage recycle bin' selected. The left sidebar is the same as the previous screenshot. The main area shows a table of files in the Second stage recycle bin:

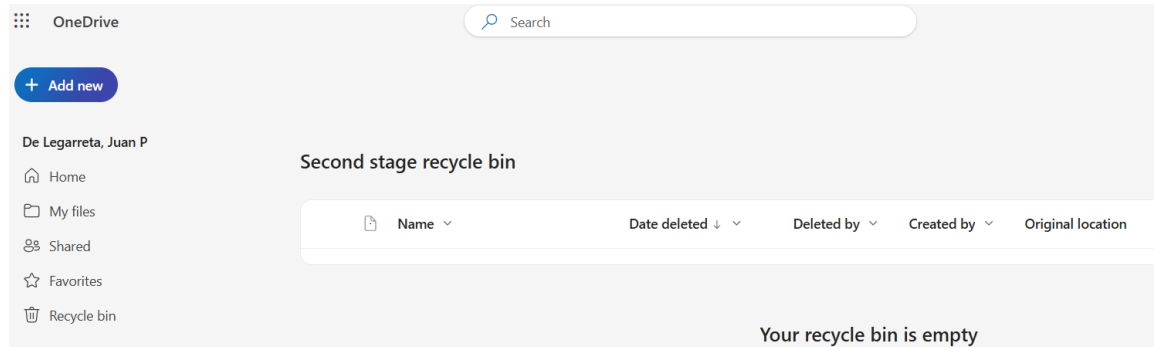

| Name                         | Date deleted      | Deleted by         | Created by         |
|------------------------------|-------------------|--------------------|--------------------|
| Lab 9 OneDrive Document.docx | 3/25/2025 9:36 AM | De Legarreta, Juan | De Legarreta, Juan |

The file is, however, in the Second stage recycle bin.

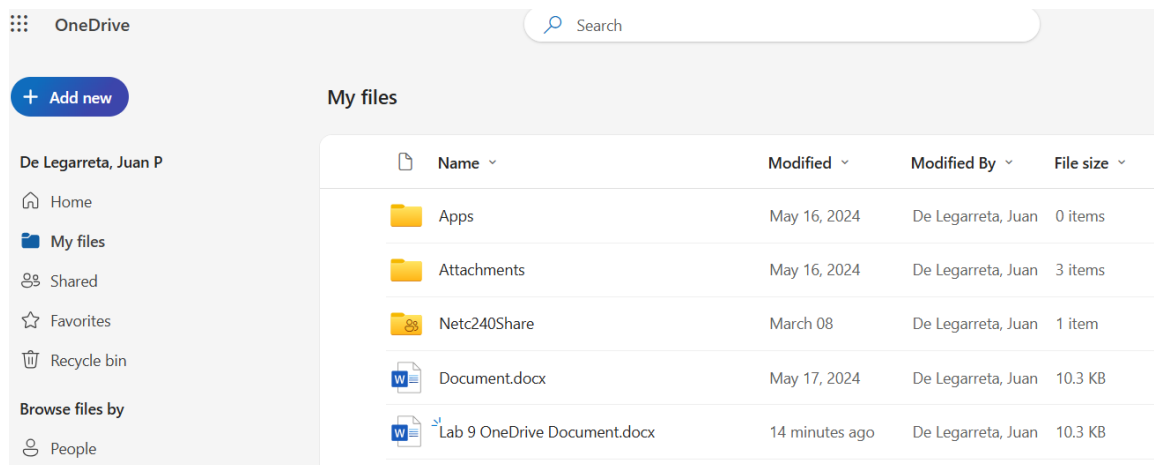

The screenshot shows the OneDrive interface with the 'Second stage recycle bin' selected. The left sidebar is the same as the previous screenshot. The main area shows a table of files in the Second stage recycle bin, with the file 'Lab 9 OneDrive Document.docx' selected (highlighted in blue):

| Name                         | Date deleted      | Deleted by         | Created by         |
|------------------------------|-------------------|--------------------|--------------------|
| Lab 9 OneDrive Document.docx | 3/25/2025 9:36 AM | De Legarreta, Juan | De Legarreta, Juan |

I clicked 'Restore'.

The second stage recycle bin is now empty, and the file is once again in the My Files folder (below).

### Part 3

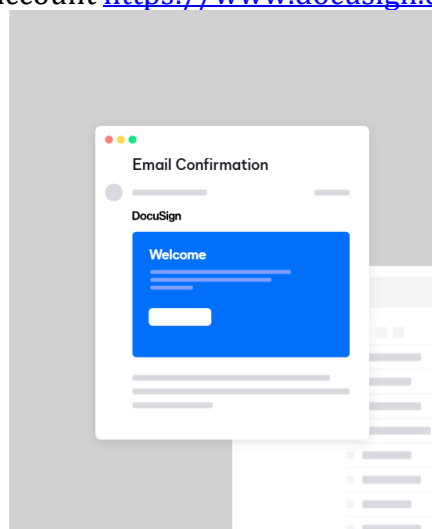

1. Create a free DocuSign account <https://www.docusign.com/trial/free>

#### Check your email

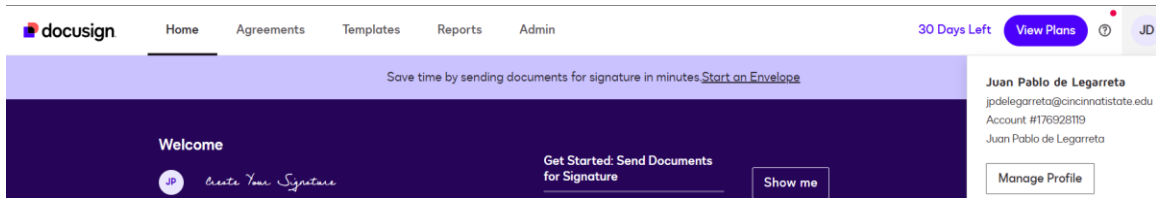

We sent a confirmation link to:  
**jpdelegarreta@cincinnatiastate.edu**

Check your inbox and follow the instructions to get started.

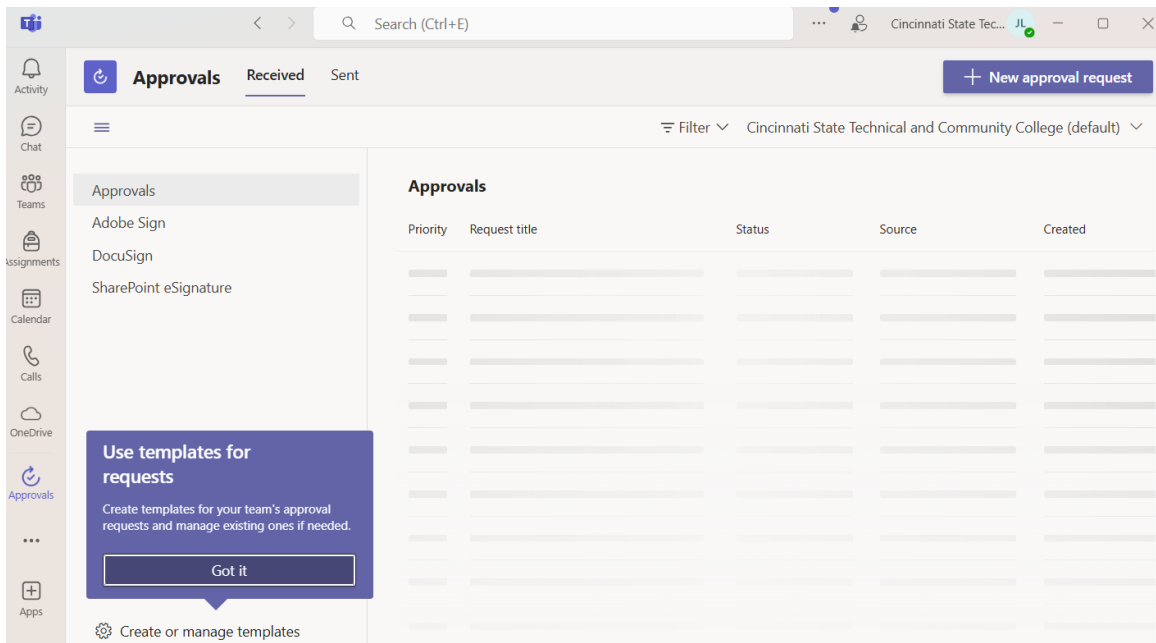

[Use a different email address](#)

The confirmation of signing up (above), and the logged in home page in DocuSign(below):

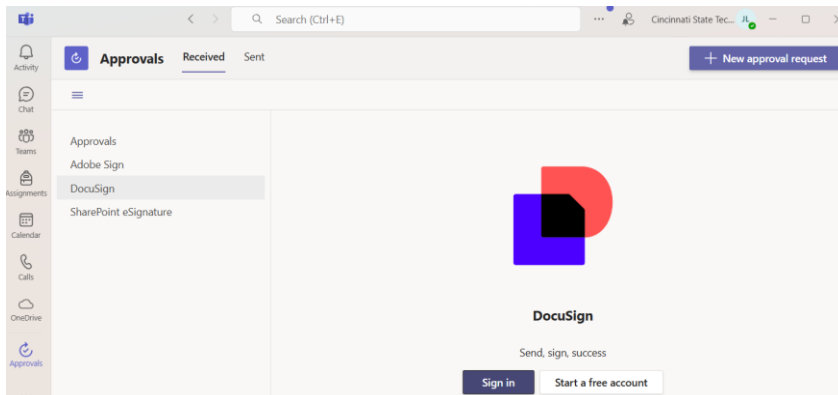

## 2. In your Teams site (part 1), add the Approval app

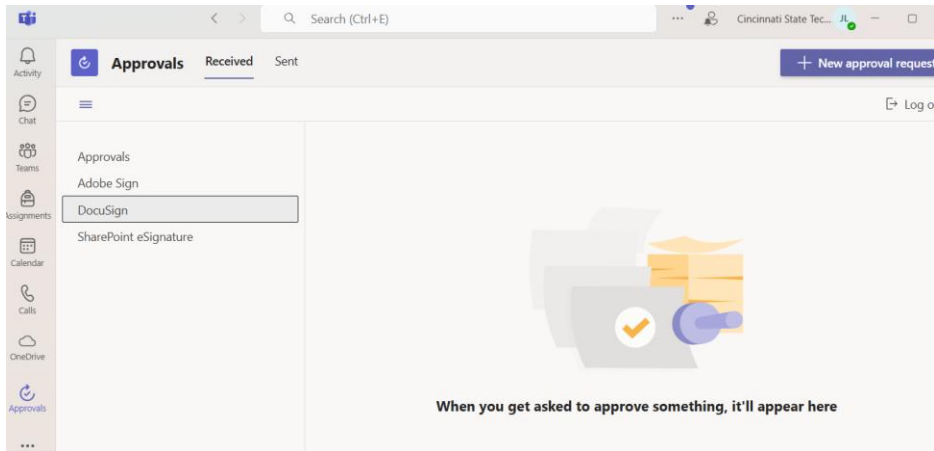

Added the Approvals app to MS Teams.

## 3. Link your DocuSign account to the app

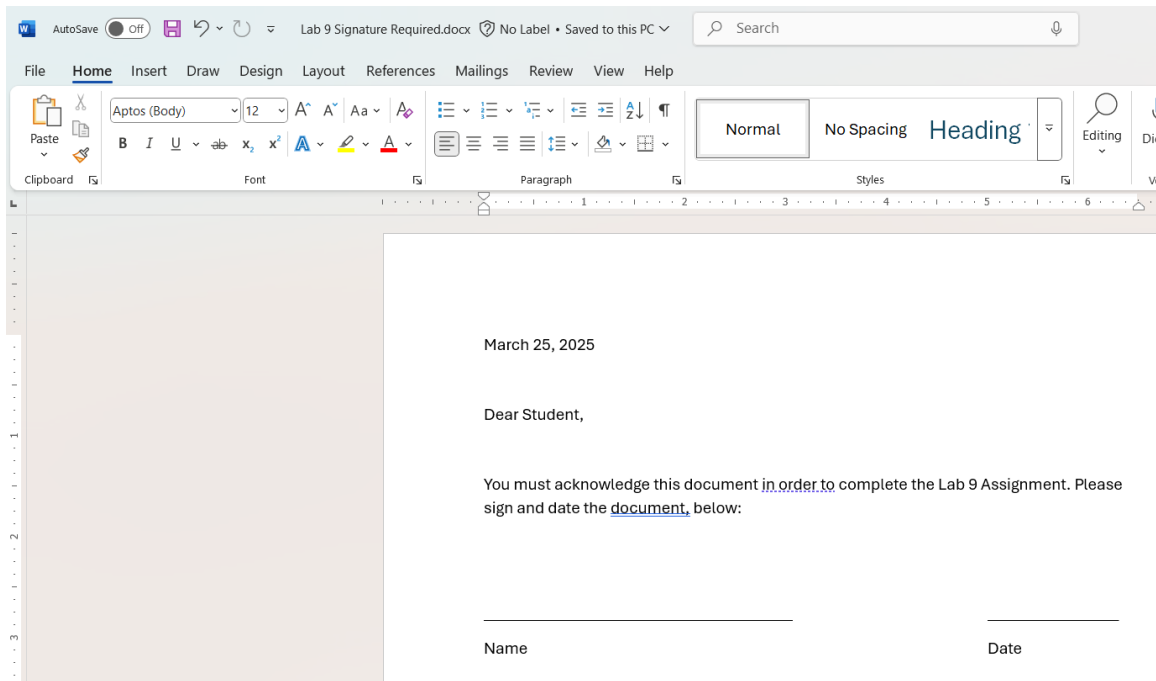

You can link your DocuSign account to Teams through the Sign In option, above.

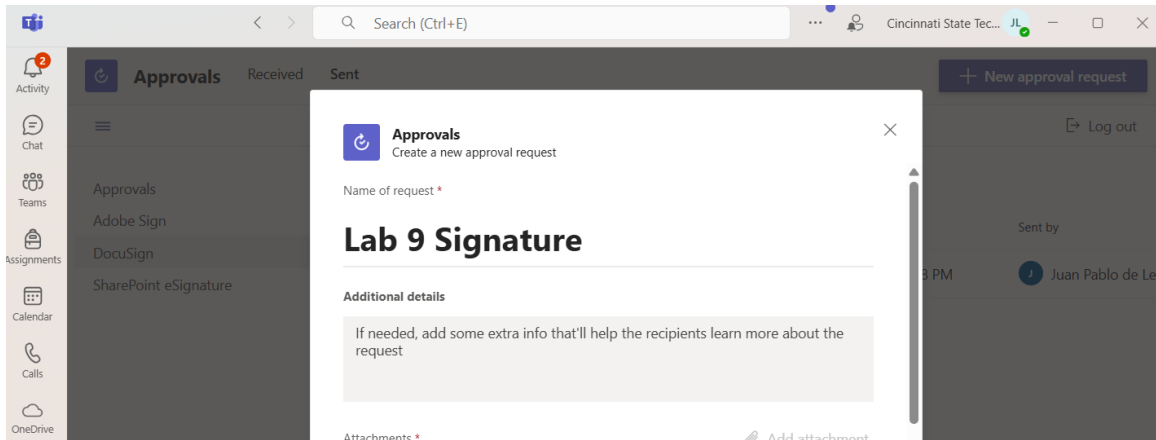

Here I have logged into DocuSign and have no pending approval requests.

4. Create a simple MS Word document that includes some simple statement that you require the user to sign. Save the document

Simple document requiring signature titled Lab 9 Signature Required.

- a. Open the Approval app and create a New Approval Request for DocuSign

An approval request has been initiated.

b. Attach a document and your College email for the recipient

**Approvals**  
Create a new approval request

If needed, add some extra info that'll help the recipients learn more about the request

**Agreement Signed**

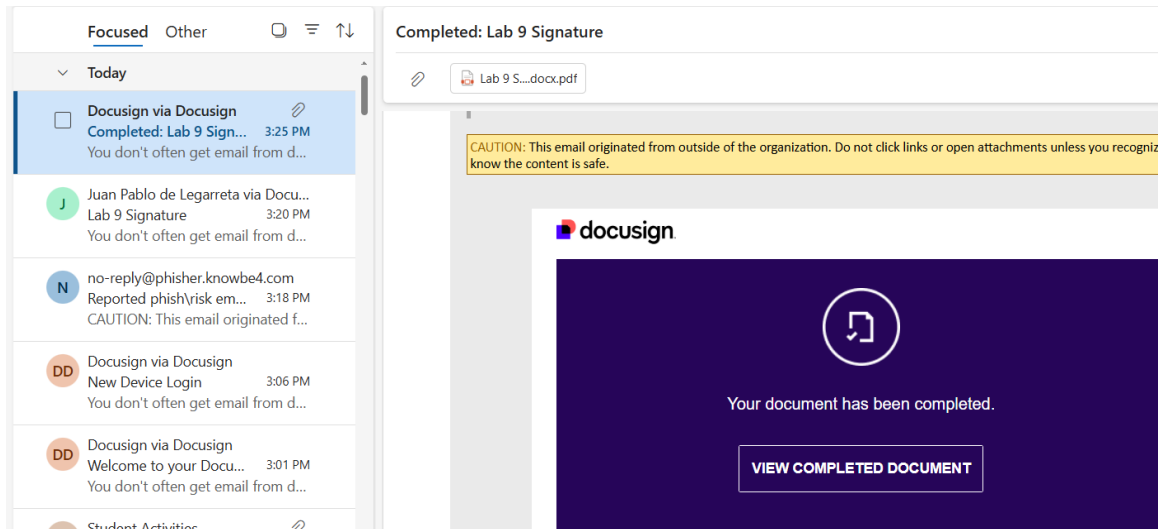

**The agreement has been signed successfully**

When it comes to signing important documents, 8 out of 10 signers prefer our trusted platform. Start sending and signing today.

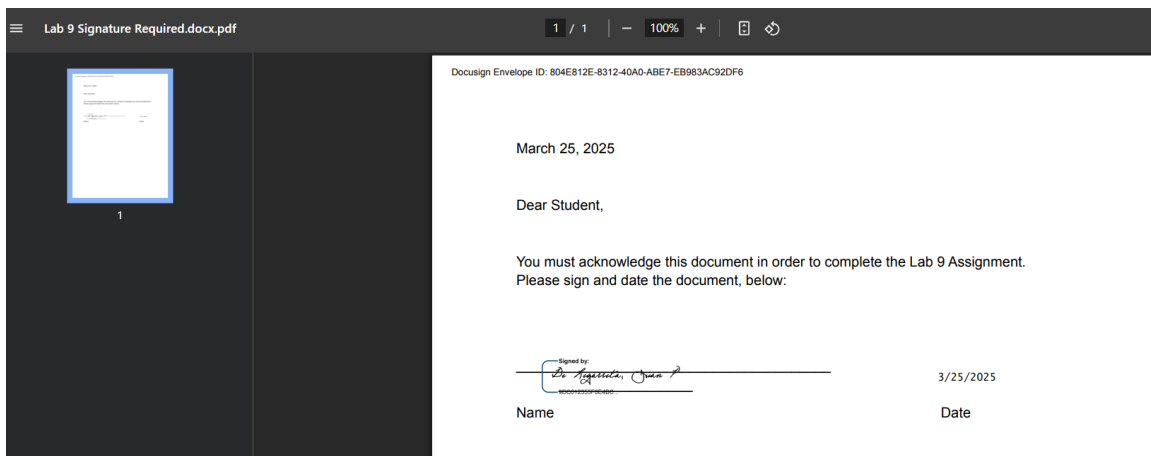

Upgrade to unlock templates, bulk send, and more. Collect more signatures and securely store all your agreements with a DocuSign paid plan.

[View Plans](#)

Completing the signature, I got this confirmation page (above) and confirmation email (below).

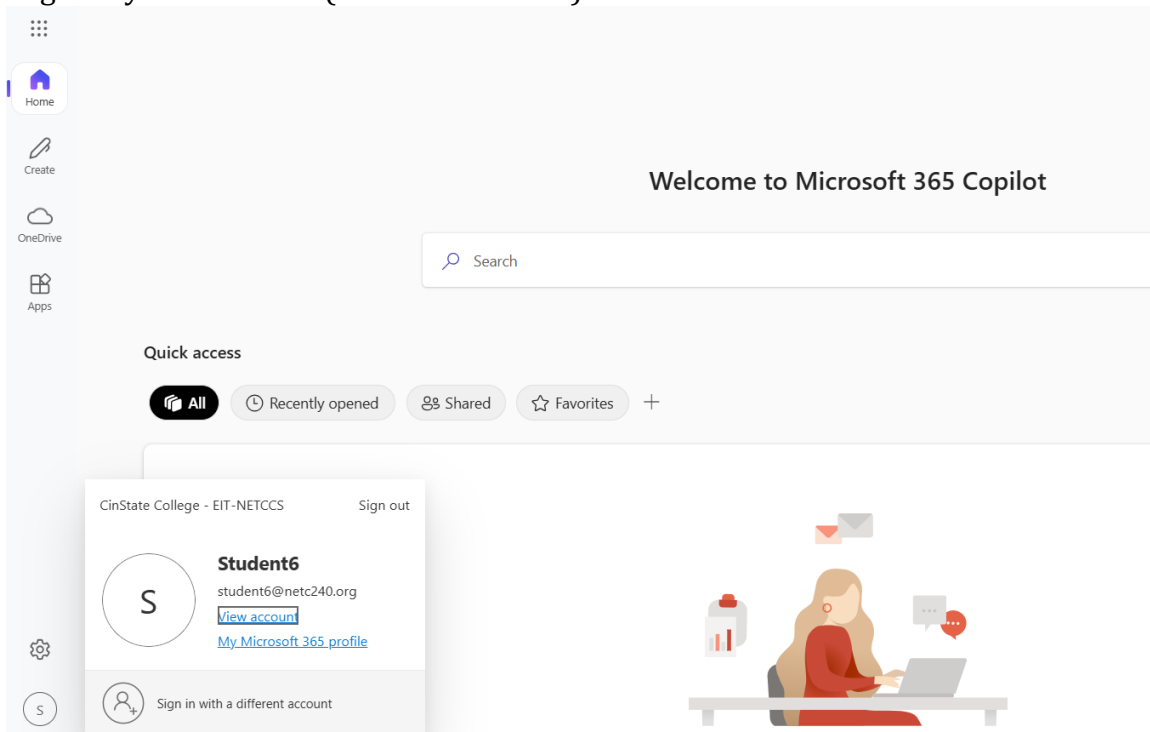

- Download the signed document. Include a screenshot of your signed document

Here is the downloaded signed document (above).

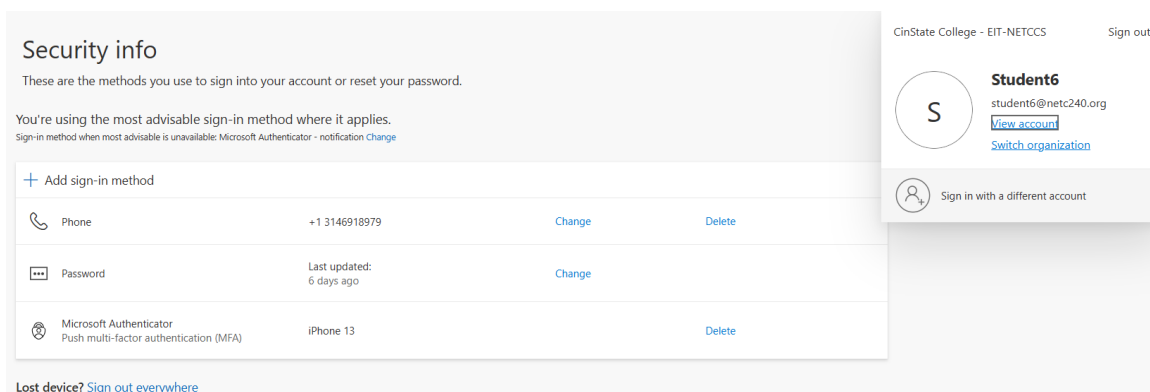

## Part 4

1. Log into your M365 F3 (Frontline worker) account.

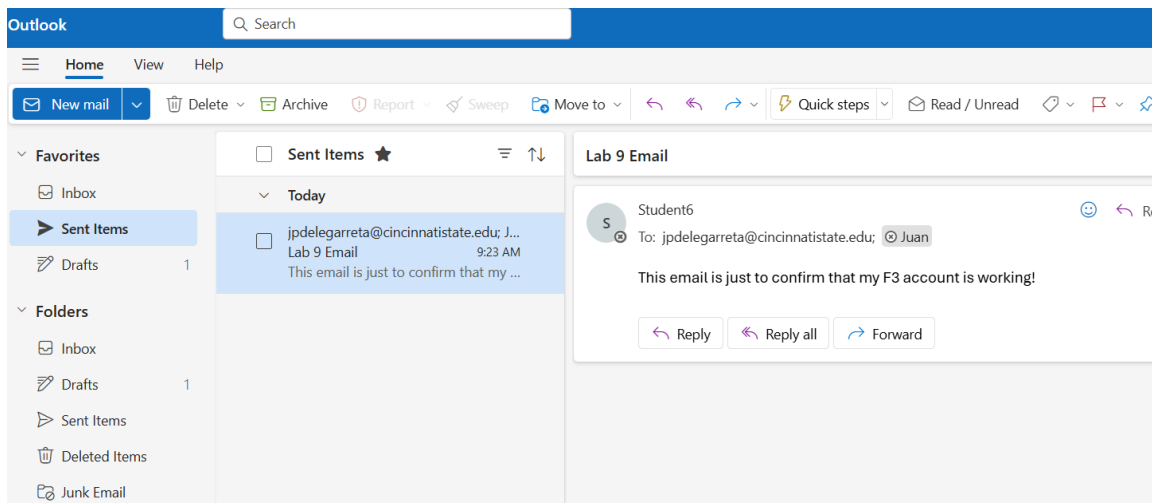

Logged into office.com using my F3 'student6' account.

2. Setup MFA

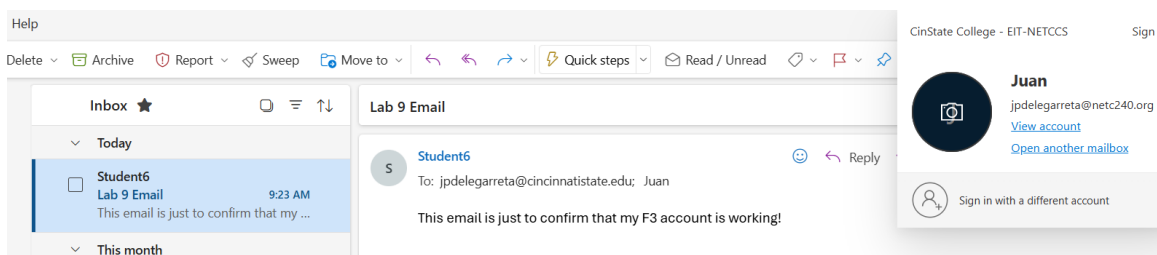

I forgot to take a screenshot of setting up MFA when I first logged in, so I went to the settings to confirm that this account has MFA through the Microsoft Authenticator App on my iPhone.

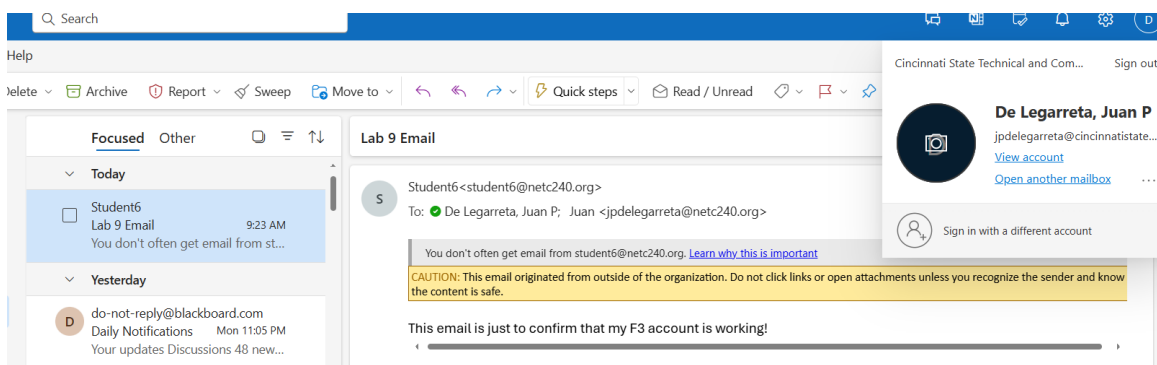

3. Send an email from your F3 account to your E5 and college email account

Above is a screenshot of the email in the sent folder of the F3 account (student6). Below is a screenshot of the email inbox from the E5 and the College email accounts confirming the email was received.

E5 email above, college email below.

**For each of the questions, answer in your own words. Include any reference links.**

*Q1. Assuming you have 3 computers, which are all logged into MS Teams. One computer's status is set to available, another to "do not disturb" and a third to*

*unavailable. How does Teams handle this situation? What would others see about this user's status. Explain.*

If a single user had three different Teams instances all with different statuses, others would see the user's status or 'presence' reflected by the computer that was last used. According to Microsoft documentation, "If a user is logged in to Teams on two or more devices (for example, on both a desktop computer and on a phone), then the device where they were active most recently determines their presence."

This means that Teams would adjust the presence to whichever device was last used, whether that be the available, do not disturb, or unavailable.

<https://learn.microsoft.com/en-us/microsoftteams/presence-admins>

*Q2. Someone you need to talk to ASAP has their Team's status set to "do not disturb". A standard Chat message will not alert them. How can you get a chat message through to them? Explain*

When sending a message, you can alter the urgency or importance of the message by clicking the three dots option before sending it. Selecting the urgent option will 'bypass' the do not disturb and give a notification to the recipient.

Source: <https://support.microsoft.com/en-us/office/mark-a-message-as-important-in-microsoft-teams-ea99d5b6-1317-4550-8d75-86ff14cd4462>

*Q3. What are the file size limitations and file types for uploads to a Teams site?*

The files uploaded to a Teams site are essentially stored either in SharePoint or OneDrive. SharePoint can hold up to 1 TB of data per tenant, but individual file sizes are capped at 250 GB per file.

As for types, certain file types are not able to be uploaded to SharePoint and OneDrive, such as local files with .ini or .ds extensions. Executables are also typically blocked, such as .exe, .sh, .dll, etc.

Sources:

<https://learn.microsoft.com/en-us/sharepoint/sharepoint-storage-planning#optimize-storage-usage>

<https://learn.microsoft.com/en-us/microsoftteams/limits-specifications-teams>

<https://support.microsoft.com/en-us/office/restrictions-and-limitations-in-onedrive-and-sharepoint-64883a5d-228e-48f5-b3d2-eb39e07630fa>

*Q4. Explain the purpose of the F-type (F1, F3, F5) license in M365. Include two example jobs that would make sense to assign an F-license.*

F-type licenses are designed for the 'frontline workforce', whose emphasis is on flexibility in communication, collaboration, and productivity. These licenses are very affordable and offer a limited suite of MS365 products that make the most sense for frontline workers.

Two examples of jobs that would make sense to have an F license assigned to them are delivery drivers and warehouse workers.

Source: <https://www.microsoft.com/en-us/microsoft-365/enterprise/f1>

*Q5. Find two alternatives to DocuSign. Include the links and create a table that shows the meaningful differences and pricing.*

Two alternatives for DocuSign are PandaDoc and Adobe Sign. Both are easy to use, have mobile applications, include customizable features, have great security and are compliant with strict regulations such as HIPAA and GDPR, and offers document tracking and notifications. The main differences between them are the document editing feature, integrations, and pricing.

| Feature                 | PandaDoc                                                                                                                                                                                          | Adobe Sign                                                                                                                                                                                                                 |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Document Editing</b> | Includes a document editor for creating and modifying documents                                                                                                                                   | No built-in editor, works mainly with existing documents                                                                                                                                                                   |
| <b>Integrations</b>     | Integrates with third party services like Salesforce, HubSpot, and Microsoft 365                                                                                                                  | Integrates well with Microsoft 365, limited integration with other third parties                                                                                                                                           |
