

NETC 280 – Lab 3 – Introduction to O365 for IT Documentation

Instructor: Phillip Haller SP/26

Note: For this lab, the use of AI is not acceptable. All answers/paragraphs written should be in your own words. Use of AI may result in a zero for this lab. Document any sources used.

Lab 3, Part 1: Word

For part one of this lab, you will create a word document, write a short paragraph about Office365, and include accurate pagination and save it:

1. Open **Word**
2. Create a 1-page document titled: **“IT Orientation – Office 365 Overview”**
3. Include:
 - A heading
 - A short paragraph explaining what Microsoft 365 is
 - A bulleted list of **three benefits** (collaboration, cloud access, version history, etc.)
4. Apply:
 - A built-in style (Heading 1)
 - One formatting change (bold, spacing, alignment)

Lab 3, Part 2: Excel

For part two of this lab, create an excel spreadsheet and manipulate the data entry tables. Learn how to use arithmetic functions in Excel.

1. Open **Excel**
2. Create a small table of basic tools that every homeowner should have:

Tool	Cost
Hammer	0
Screwdriver	0
Utility Knife	0
Adjustable Wrench	0
Measuring Tape	0
Pliers	0

3. Add:
 - **A SUM formula to calculate total monthly cost**
 - Basic formatting (bold headers, borders)

Lab 3, Part 3: PowerPoint

For part three of this lab, create a PowerPoint presentation with three slides, they should include a clear design choice. You will LOSE points if you do not choose a design or make your own.

1. Open **PowerPoint**
2. Create **3 slides**:
 - Slide 1: Title slide – “Microsoft 365 Tools”
 - Slide 2: “Productivity Tools” (Word, Excel, PowerPoint)
 - Slide 3: “Collaboration Tools” (Teams, SharePoint, Visio)
3. Use:
 - A built-in theme, or one of your own design
 - At least one icon or graphic

Lab 3, Part 4: SharePoint

For part four of this lab, you’ll need to work with other students to create a SharePoint and add each other to your group:

1. Open **SharePoint**
2. Navigate to **create site, team site, standard team, use template**
3. Name your Site – YourName-NETC280 (philliphaller-netc280, for example) and make sure you keep your site PRIVATE. Then add the instructor and at least one other student to the site.
4. Upload **all of your files from this lab** to this SharePoint.

Your SharePoint should include:

1. Your Word file with your paragraph about What O365 is.
2. Your Excel spreadsheet with your tools, prices and using the SUM formula
3. Your PowerPoint presentation that includes three slides with a design theme

For turn in: Take a single screenshot of your SharePoint saved as a .PNG file and upload it.
